

Amr Ramadan

Senior Mobile Developer (Flutter)

 amr.raamadan@outlook.com  +201065328644  Cairo, Egypt  GitHub  LinkedIn  Portfolio

Summary

Senior Flutter Developer with 4+ years of experience building secure, scalable mobile applications for fintech, healthcare insurance, ERP systems, and e-commerce. Strong in Dart, BLoC/Cubit, Clean Architecture, dependency injection, REST APIs, and real-time data streams (WebSocket, WebRTC). At NeQabty, a fintech platform for syndicates and unions in Egypt, I build online payments and subscriptions, medical insurance and claims flows, and text and voice AI assistants, and I own app security, build flavors, and the CI/CD pipeline. Delivered production apps for users across Egypt, Saudi Arabia, and Jordan.

Education

09/2018 – 06/2022
Cairo, Egypt

Bachelor of Computer and Artificial Intelligence

Helwan University

- Graduation Project: Developed a mobile application for creating personalized nutrition plans using AI-powered image recognition to analyze food nutrients (carbs, proteins, fats).
- Trained a deep learning model with TensorFlow on a large food image dataset and integrated it with a Flutter frontend and Firebase backend for seamless functionality.

Professional Experience

05/2025 – Present
Cairo, Egypt

Flutter Developer at NeQabty (Fintech)

- Building the new Egyptian Engineers Syndicate app: annual subscriptions, medical healthcare and insurance renewal, dependents management, and medical claims with document upload and status tracking.
- Developed subscription and online payment flows with payment gateway integration, modeled as BLoC/Cubit states so an interrupted payment never leaves a member's account in a broken state.
- Led the member-support AI assistant, both text-to-text and voice-to-voice (speech-to-text, streamed answers, text-to-speech) over WebSocket, reducing response time by 40%.
- Implemented app security: certificate pinning, secure token storage, encryption, role-based access control, and code obfuscation to protect members' personal and financial data.
- Set up dev, staging, and prod flavors and CI/CD with GitHub Actions and Fastlane; structured features with Clean Architecture, BLoC/Cubit, and get_it.

05/2024 – 05/2026
(Part-time / Remote)

Flutter Developer at SDS

- Designed and developed mobile ERP modules for HR, Finance, Inventory, and Sales, improving operational efficiency by 30%.
- Integrated real-time ERP APIs for synchronization and dashboard updates, ensuring seamless data flow across departments.
- Enhanced user experience through role-based access and multi-language support, increasing adoption rates among diverse user groups.

01/2024 – 10/2024
Remote, Saudi Arabia

Flutter Developer at Code700

- Built e-commerce apps with checkout systems, secure payment gateways, and product catalogs, increasing revenue by 15% in the first quarter post-launch.
- Developed video streaming features (upload, playlists, deep linking, PiP, background playback) using Flutter, increasing user engagement.
- Configured CI/CD pipelines and managed multiple build flavors, optimizing release cycles and improving deployment efficiency by 50%.

01/2023 – 01/2024
Remote, Saudi Arabia

Flutter Developer at TX

- Integrated native Android/iOS code via Method Channels, improving cross-platform functionality and expanding the app's feature set.
- Developed real-time audio & video calling using WebRTC, enhancing communication features and increasing user retention by 25%.
- Optimized device-level performance by building efficient background services, improving battery life by 20%.

06/2022 – 10/2022
Cairo, Egypt

Flutter Developer intern at Magdsoft

- Developed e-commerce mobile features using Flutter and Firebase, including real-time product listings and user authentication flows.
- Implemented BLoC and Cubit for state management across shopping cart, product catalog, and authentication modules.

06/2022 – 10/2022
Cairo, Egypt

Flutter Developer intern at Algoriza

- Contributed to a Flutter-based hotel reservation app, implementing search filters, real-time booking availability, and payment processing.
- Integrated RESTful APIs for dynamic data fetching, booking confirmation, and cancellation handling.

Projects

Egyptian Engineers Syndicate

Android & iOS | Status: In development (release pending)

- Technologies: Flutter, Dart, BLoC/Cubit, Clean Architecture, Dependency Injection, REST API, Payment Gateway
- Description:
 - Members' app: yearly subscription and medical coverage renewal, dependents, and medical claims.
 - Kept claims and payments in sync with the insurer, with clear states so members always see where a request stands.

Neqabty

Android & iOS | Status: Live on stores

- Technologies: Flutter, Dart, Firebase, Payment Gateway, Google Maps, Bloc
- Description:
 - Fintech app for syndicate members: membership renewal, subscriptions, online payments, and nearby pharmacies on the map.
 - Bloc handles sessions and checkout so an interrupted payment never breaks a member's account.

Car Market Association

iOS | Status: Live on App Store

- Technologies: Flutter, Dart, Bloc, REST API, Social Authentication, Deep Links, Push Notifications
- Description:
 - Used-car marketplace: listings from individuals and showrooms, advanced filters, inspection reports, and viewing bookings.
 - Handled large, image-heavy data with pagination, lazy loading, and image caching; social sign-in and deep links.

Qaaf

Android & iOS | Status: Live on stores

- Technologies: Flutter, Dart, CI/CD, Flavors, Bloc
- Description:
 - Video streaming app with upload, channels, playlists, deep linking, picture-in-picture, and background playback.
 - Bloc manages the player, uploads, and background services; CI/CD and flavors keep releases quick.

Jomlah Express

Android & iOS | Status: Live on stores

- Technologies: Flutter, Dart, Firebase, REST API, Payment Gateway, Google Maps, Provider
- Description:
 - Wholesale e-commerce app with catalog browsing, secure checkout, and order tracking on Google Maps.
 - Used Provider and Firebase to keep the cart, product filters, and real-time order updates consistent across screens.

Catwa

Android & iOS | Status: Live on stores

- Technologies: Flutter, Dart, Firebase, Google Maps, Provider
- Description:
 - Pet food shopping app with a catalog, cart, and delivery scheduling.
 - Provider keeps the cart, sessions, and delivery scheduling consistent through checkout.

Technical skills

Mobile Development

Flutter, Dart, Asynchronous Programming (Futures, Streams), Custom Animations, Responsive Design, Method Channels, Native SDK Integration (Kotlin/Swift Plugins), App Size & Build Optimization

State Management

BLoC, Cubit, Riverpod, Provider, GetX

Backend & APIs

RESTful API Integration (Dio), Real-time Data Streams, WebSocket, WebRTC, Firebase (Authentication, Firestore, Cloud Functions, FCM), Push Notifications, Social Authentication, Deep Links

Fintech, AI & Maps

Payment Gateway Integration, Subscriptions & Renewals, Insurance & Claims Flows, AI Chat (Text-to-text, Voice-to-voice, Speech-to-text, Text-to-speech), Google Maps

Architecture & Patterns

Clean Architecture, MVVM, MVC, Dependency Injection (get_it), SOLID, OOP, Localization & Internationalization (RTL), Flavors

Testing & DevOps

Unit, Bloc, Widget & Integration Testing, CI/CD (GitHub Actions, Fastlane), Git & Version Control, Flutter DevTools (Memory Profiling, Jank Detection, Rebuild Tracking)

Offline & Local Storage

Hive, SQLite, Offline-first Architecture, Image Caching, Pagination

Security

Certificate Pinning, Secure Storage, Code Obfuscation, Encryption, Authentication & Role-based Access Control

Languages

Arabic — Expert
Native proficiency

English — Proficient
Advanced proficiency (both written and spoken)
